

## FLY-ASH BRICKS

### FLYASH BRICKS

We are identified as one of **leading** Manufacturers and Suppliers of FLYASH BRICKS in the industry. Our 4 “Inches Fly Ash Bricks are fabricated from quality raw materials that assure for high strength and durability. With strong manufacturing capability, we are able to meet the bulk requirements of the clients within stipulated timeframe.

Fly ash bricks are manufactured with FLG (Fly Ash, Lime, and Gypsum), using a high compressive tonnage press. Our bricks are non-fired and consume very low energy in production. Our Fly ash bricks have the following salient features:

#### TECHNICAL SPECIFICATION

- **Size** : 230 x 110 x 75 mm
- **Water Absorption** : Less Than 15 %
- **Compressive Strength** : 6 N/ Sq.mm
- **Uses** : Construction of Wall
- **Color** : light grey

#### SALIENT FEATURES:

- High Compressive Strength
- Low water absorption
- Dimensional accuracy / Uniform Shape
- High strength / weight ratio
- No emission of green house gases during production
- Zero efflorescence
- Consume less mortar in construction
- Economical & environment friendly
